Irrigation Engineering By S K Garg - w1.kartrocket.com
Irrigation Engineering. Water is required for agriculture. Sometimes this water requirement is fulfilled by rain, but there are some dry areas where irrigation is the only process by which water is supplied to crops. Irrigation can be termed as the artificial process of applying water to the soil to help in growing agricultural crops or maintaining the landscapes when there is shortage of natural water by rain.

Irrigation Engineering And Hydraulic Structures: Amazon.co ...
Water Resources Engineering focuses on the use and management of land and water resources in rural and urban watersheds. Definition: Irrigation is the controlled application of water to croplands. Its primary objective is to create an optimal soil moisture regime for maximizing crop production and quality while at the same time minimizing the environmental degradation inherent in irrigation of agricultural lands.
